

# UKG for Transits

## Driving success for your organization with flexible workforce solutions

UKG® solutions for transit organizations help you find and keep top employees, simplify tasks, improve operational efficiency, and help you create an internal culture of caring where employees feel supported and valued.

Depending on your transit organization's size, needs, and goals, our suite of human capital management and workforce management solutions streamline workflows; improve bidding, staffing, and scheduling; automate policies; help ensure regulatory and CBA compliance; and deliver enhanced transparency and accountability to the community.

Our solutions can also help you deliver a great employee experience, from providing mobile self-service options to assisting you with implementing Diversity, Equity, and Inclusion initiatives and creating a culture of caring — especially attractive in a competitive hiring landscape and in addressing concerns about frontline worker safety.

### UKG for transits can help you:

#### Improve staffing and scheduling

Schedule more efficiently, align labor to demand, and make more informed staffing decisions.

#### Offer a better employee experience

Improve onboarding and retention by automating tasks and providing self-service options within a culture of caring that can lead to better business outcomes.

#### Increase efficiency

Streamline workflows, optimize scheduling, and track grant funding to labor more accurately.

#### Enhance operations

Automate attendance and leave policies, control labor costs through greater data visibility, and improve compliance with automatic system updates.

“[We use] UKG to be more efficient with our scheduling, better manage our overtime, and help employees have a proper work-life balance. In addition, when the buses and trains are running on schedule because our people are reporting to work on time, it helps our riders — our customers — safely and efficiently arrive to their final destinations.”

Keith Belk, Project Portfolio Manager  
Washington Metropolitan Area Transit Authority
