Pro Benefits Integrations

Connect the critical systems your organization relies on with ease.

With UKG's strategic approach, you can simplify data integrations with the right *platforms, frameworks, and toolkits* to build integrations with UKG's solutions.

Our prebuilt solutions help you seamlessly integrate data between different apps, so you can drive significant cost savings, increased scalability, and improved visibility.

Move faster

Prebuilt carrier apps allow you to setup integrations more quickly – benefits carrier integrations are 70% faster when compared to custom integrations.

Increase visibility

Using these prebuilt carrier apps reduce errors and complexity and provide you with the ability to check the status of your integrations and catch errors.

Improve data

With more automation and more robust integrations, you can be more confident in the accuracy of your data transfers.

Each app is designed to work with a specific vendor and file layout. Platforms, connectors, and low- and no-code solutions provide flexibility and allows you to easily connect best-in-class solutions to fit your unique needs.

Our tools can quickly consolidate your workforce data by bringing it into your UKG solution – empowering you to better monitor, transmit demographics, payroll contributions and open enrollment elections with our most popular vendor integrations.

Check out a highlighted selection of the carriers that we integrate with.

Our breadth of modern technologies and methods allow us to integrate our solutions with many carriers. We are consistently expanding the number of integrations and continue to modernize the technology, methods, and experiences we employ to build them.
