

# Methodology

The Workforce Activity Report by UKG is an index that measures week-by-week metrics including employee shifts worked and pay statements from 4.2 million employees across more than 35,000 U.S. businesses.

“Shifts worked” is a total derived from aggregated employee time and attendance data and reflects the number of times that employees — especially those who are paid hourly or must be physically present at a workplace to perform their jobs — “clock in” and “clock out” via a time clock, mobile app, computer, or other device at the beginning and end of each shift.

Since April 2020, UKG public sector data has included public K-12 and higher education institutions, in addition to traditional public sector government organizations.

As is customary during the June-September timeframe, UKG will not report on public sector data until schools return in the fall.
