

UKG Pro Workforce Management Activiti Empowerment

Take control of your solution!

UKG Pro Workforce Management® (formerly UKG Dimensions®) is powered by our intelligent cloud platform to support the next generation of workforce management. Our platform delivers a robust application programming interface (API) framework that provides extensibility and simplifies integration with other systems. Clients using the Alfresco Activiti™ Business Process Management platform can partner with UKG to help their development staff understand UKG-specific workflow strategies and techniques.

Activiti Empowerment Services from UKG provides the foundational components your developers need, helping ensure they can successfully develop, modify, and support your process models and deployed workflows in the long term. Our developers bring extensive technical expertise, rich domain knowledge, and decades of experience to every engagement, helping you effectively address your business process complexity and accelerate time to value.

Activiti Empowerment comes with remote services to make delivery easy and bolster effectiveness

Begin with self-paced classes followed by two full days of instructor-led training by one of our certified business-process-model experts.

Your certified staff will gain an understanding of UKG-specific business process models and UKG-delivered workflows.

Staff will also learn UKG-specific tips, tricks, and best practices for using configurable business processes.

About UKG

At UKG, our purpose is people®. As strong believers in the power of culture and belonging as the secret to success, we champion great workplaces and build lifelong partnerships with our customers to show what's possible when businesses invest in their people. One of the world's leading HCM cloud companies today, UKG and our Life-work Technology™ approach to HR, payroll, and workforce management solutions for all people helps more than 75,000 organizations around the globe and across every industry anticipate and adapt to their employees' needs beyond just work.
