- **Minimize organizational risk** with a detailed, comprehensive functional and technical solution

- **Develop a roadmap strategy** that aligns UKG Pro Workforce Management with your business objectives

Are you interested in migrating to UKG Pro Workforce Management?

Our UKG Pro Workforce Management (formerly UKG Dimensions™) migration offering is carefully designed to help your organization assess your overall readiness and best prepare for your migration.

The chances are good that your organization's current on-premises or cloud-based UKG solution has changed since you first installed it. As a result, it may be difficult to audit, review, and validate your solution in an objective way to ensure a smooth, quick migration to UKG Pro Workforce Management. This can also be the perfect time to identify ways to improve your workforce practices, so that bad habits don't carry over into the new solution.

Our services team will outline how UKG Pro Workforce Management will differ from your current UKG Workforce Central™ suite solution and illustrate what may be changed, from new functionality that could potentially eliminate existing processes and the need for custom integrations to how the product roadmap could impact your solution. The review will also identify areas where technical and business process improvements can be made.

Our services team then presents the opportunities for improvement in an executive dashboard summary and a comprehensive report that details these findings as well as actionable recommendations for migrating to UKG Pro Workforce Management. Part checklist and part roadmap, the report helps you create an environment consisting of technical, business, and functional best practices to achieve the most successful migration possible. If you're interested in migrating your UKG Workforce Central solution to the UKG Pro Workforce Management solution, and want to make sure you have a comprehensive review before making the move, we have the answer.
