Charts and Dashboards

Keeping up with your people data is critical to success for HR, payroll, and managers alike, but digging through line after line of information in table just isn't possible with all the other day-to-day tasks you need to accomplish. The UKG Ready® solution makes it easy to spend less time organizing data and more time acting on it. Charts and dashboards are available across the system, helping you intuitively visualize the facts that make an impact.

Quick Visualization Builds

The Ready Visualization Tool stays consistent and simple across all your reports, letting you select specific data points and add the charts that work best to show them right from the main report screen on any device:

- Intuitive side panel with chart previews and creation options
- Flexible displays can show combinations of tables and charts to fit your needs
- Multiple views can be built to see report data from different angles
- Available automated guidance on chart design and specific analytics questions*
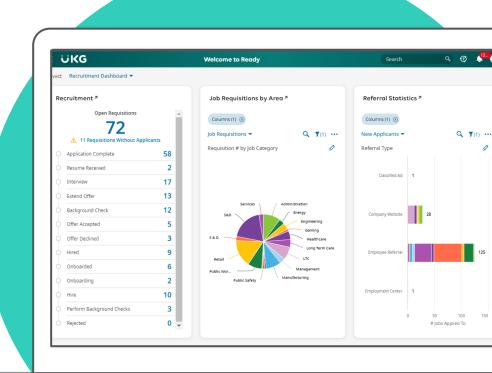

Actionable Displays

The charts you add are interactive and shareable, letting you dig into key details fast and provide the right insights to those who need them:

- Select specific charts or areas within them to automatically filter data
- Send chart views to teammates or set visibility for specific groups
- Quickly highlight positive results or areas of concern to follow up on

Personalized Dashboards

Ready dashboards adjust to fit the needs of the different people using the system, supporting specific roles and focus areas:

- Use suggested dashboard layouts to accommodate specific needs
- Pull charts from several reports into one location to track related items
- Connect data to action by adding relevant tools to dashboards

*Guided analysis available through UKG Ready® People Insights
