

Payroll

Drive efficiency and deliver compliance by delivering the **perfect paycheck** every time.

UKG Dimensions™ Payroll simplifies payroll processing by ensuring payroll accuracy through a compliant-backed platform — reduce processing time, gain heightened control over payroll, and create the perfect paycheck by leveraging a unified, end-to-end solution with future-ready and insightful reporting. This powerful, easy-to-use payroll solution is unified with the UKG Dimensions HCM suite, and provides the automated tools and high-quality information needed to instantly control labor costs, minimize compliance risk, and improve work results for all people.

Real-time updates

No more time lost submitting work to a service bureau. You can process payroll on your own schedule and complete special payroll runs like commissions or bonuses. This means you have the flexibility to complete as many separate payroll runs as needed, and you won't have to wait for data to sync or risk having incorrect data whenever you're ready to process payroll.

Flexible pay rules

Keep a pulse on what you're paying your people with our flexible pay rules engine, which makes it simple to determine pay associated with various hours worked by supporting any payroll scenario — shift differentials, employees with multiple positions, locations, currencies, and more — enabling you to accommodate your organization's unique requirements.

Timely compliance updates

Accurately complete gross-to-net calculations, and easily create the standard annual reporting forms needed to meet IRS requirements. Reduce your time spent researching regulations through automatic legislative updates, including the latest tax tables, while leveraging our industry-backed service experience to make sure withholdings are always accurate.

Key benefits

For HR and payroll professionals

Increase payroll accuracy with a unified solution for payroll, HR, and workforce management

Drive accuracy of withholdings with regular tax table updates for all your people

Improve compliance and mitigate risk with automatic updates to comply with the latest regulation changes
