

Pro Workforce Management Analytics

For years, organizations have struggled to gain timely access to the workforce management information they need to produce actionable insights. UKG Pro™ Workforce Management Analytics (formerly UltiPro® with Workforce Dimensions Analytics) reimagines time-related reporting by giving you complete visibility into your operational data, along with tools for real-time visualization to help solve more complex workforce challenges.

Embedded Analytics

Provide access to embedded analytics for all users, not just business analysts. Pro Workforce Management Analytics alerts you to existing problems and what's driving them, delivers access to more than 125 key performance indicators (KPIs) out of the box, and leverages machine learning to promptly address key people challenges such as overtime and turnover.

Powerful Data Visualizations

Display all your operational data in a familiar spreadsheet format, with enhanced capabilities to:

- Sort, filter, and group data at any level of organizational detail
- Easily create charts and graphs to visualize data, and drill down to further analyze issues
- Export items to be included as tiles on your home screen or in reports

Actionable Insights

Deliver actionable insights to managers via interactive reports that include conditional formatting to highlight where issues and opportunities exist. Pro Workforce Management Analytics provides an intuitive reporting engine that allows users to easily modify standard reports or build their own.

Real-Time KPIs

Help managers, HR leaders, and business analysts gain insight into their organizations' performance in terms of key business objectives.

- Create or modify existing KPIs, targets, and thresholds
- Easily visualize information as interactive charts
- Receive alerts when certain thresholds are reached
